Melitron Celebrates 15 Years of Manufacturing Operations.

Guelph, ON - Melitron celebrates 15 years of manufacturing precision metal enclosures for some of the most successful companies in Canada and the United States. The Company began operations in 1995 as a 15,000 square foot manufacturer with 5 employees; since then, it has undergone several expansions to include a full range of enclosure manufacturing services and today employs over 100 people in a 114,000 square feet of manufacturing space in Canada and a sales center in the United States.

“This year marks a significant accomplishment for Melitron. We are extremely proud of this milestone,” said Ted Turner, President of Melitron. “As the Company’s founder, I have had an opportunity to witness our growth, fueled by our advanced manufacturing technologies, employee commitment and strong customer relationships. We look forward to continuing to grow our Company and support our customers. Our ongoing investment in the most advanced manufacturing technologies will continue to improve production efficiencies, reduce costs and help our customers achieve superior manufacturing advantages.”

About Melitron

Headquartered in Guelph, Canada, Melitron Corporation is a full service contract manufacturer of precision metal components, electronic chassis, industrial enclosures, frames/racks and self-service kiosks. Melitron specializes in providing flexible manufacturing solutions to OEMs competing in global technology markets including; aerospace, computing, datacom, energy/power, industrial, medical, and security and self-service. An integrated business model provides customers with a single source manufacturing solution encompassing design, fabrication, finishing, assembly and distribution.

Melitron’s world class facilities are equipped with latest in advanced manufacturing technologies and automated systems; enhancing efficiencies, reducing costs and delivering our customers competitive manufacturing solutions.
