### Melitron Achieves ISO 9001:2008 Recertification

Guelph, ON – Melitron Corporation, a leading precision metal enclosures manufacturing company, completed its first surveillance audit to the new ISO 9001:2008 standard. Melitron was initially certified to the ISO 9001:2008 standard in March of 2010. Melitron's third party auditor, BSI Management Systems conducted the two day audit and found no non-conformances in the areas audited.

ISO 9001:2008

The ISO 9001:2008 standard is an internationally recognized quality management system standard developed by the International Organization for Standardization (ISO). To be certified to the standard, companies must institute a quality management system (QMS) with detailed procedures outlining measures undertaken to monitor and improve business processes.

"Successful recertification to the ISO standard clearly demonstrates our commitment to product and service excellence," said Mike Turner, Melitron Vice President, and General Manager. "We remain passionate about quality, and our ISO 9001:2008 certification reinforces to our customers, vendors and employees that we follow established procedures to ensure top performance while constantly reviewing those protocols to further improve operations. This important milestone marks our continuing commitment to customer satisfaction and continual improvement."

#### About Melitron

Headquartered in Guelph, Canada, Melitron Corporation is a full service contract manufacturer of precision metal components, electronic chassis, industrial enclosures, frames/racks and self-service kiosks. Melitron specializes in providing flexible manufacturing solutions to OEMs competing in global technology markets including; aerospace, computing, datacom, energy/power, industrial, medical, and security and self-service. An integrated business model provides customers with a single source manufacturing solution encompassing design, fabrication, finishing, assembly and distribution.

Melitron's world class facilities are equipped with latest in advanced manufacturing technologies and automated systems; enhancing efficiencies, reducing costs and delivering our customers competitive manufacturing solutions. Melitron has two manufacturing facilities in Canada and a sales center in the United States. For more information, visit [www.melitron.com](http://www.melitron.com).
