Melitron Facilities Achieve ISO 9001:2008 Certification

GUELPH, ON - Melitron Corporation today announced that its two facilities in Guelph, Ontario have received ISO 9001:2008 certification for the manufacture of metal components, enclosures and assemblies with a focus on providing application design and flexible manufacturing solutions to OEMs. This represented a recertification of Melitron's Quality Management System which formerly complied with the ISO 9001:2000 standard.

The successful ISO certification was achieved through BSI America Inc., an accredited registrar, recognizing that Melitron's Quality Management System has continued to meet the strict guidelines set out by the International Organization for Standardization (ISO).

"Achieving the ISO 9001:2008 certification is an important accomplishment for Melitron and our employees. This certification demonstrates our strong commitment to quality and continuous improvement at all levels of our organization." said Ted Turner, President of Melitron. "Melitron is committed to total customer satisfaction by delivering competitively priced product, on-time and with exceptional quality."

The ISO 9001:2008 standard is a set of quality practices that ensures the use of effective processes that are consistently monitored and continually improved. As the industry standard for quality management systems, ISO 9001:2008 certification requires evaluation by an independent, accredited auditing body.

About Melitron

Headquartered in Guelph, Canada, Melitron Corporation is a full service contract manufacturer of precision metal components, electronic chassis, industrial enclosures, frames/racks and self-service kiosks. Melitron specializes in providing flexible manufacturing solutions to OEMs competing in global technology markets including; aerospace, computing, datacom, energy/power, industrial, medical, security and self-service. An integrated business model provides customers with a single source manufacturing solution encompassing design, fabrication, finishing, assembly and distribution.

Melitron's world class facilities are equipped with latest in advanced manufacturing technologies and automated systems; enhancing efficiencies, reducing costs and delivering customers competitive manufacturing solutions. Melitron has two manufacturing facilities in Canada and a sales center in the United States. For more information, visit www.melitron.com.
